

Negative Ion Light Bulb

*P*urely Anion Energy Efficient Light Bulbs are the new revolutionary light bulbs with a built-in negative ion generator. Consider this Replacing a single incandescent bulb with a CFL bulb will keep a half-ton of CO₂ out of the atmosphere over the life of the bulb. If everyone in the Europe used energy-efficient lighting, we could retire 90 average size power plants. Saving electricity reduces CO₂ emissions, sulfur oxide and high-level nuclear waste!

What is the big deal about negative ions?

Nowadays, our homes and offices filled with positive ions generated by TVs, computers, other electrical devices, and harmful building materials. Positive ions are what make us feel tired, depressed and irritable. The negative ions generated from the Purely Anion[®]bulb will remove positive ions and change the air in your home, office, warehouse, etc.. to be clean and pleasant.

Goodbye cigarette smoke and smell!

The negative Ions produced by Purely Anion[®]bulbs help make the air in your home or office cleaner, more pleasant while removing harmful germs and energy-draining positive ions. Purely Anion[®]bulbs generate over 980,000 negative ions per cubic centimeter (CC) and literally remove smoke, smells, germs and harmful fumes from

the air without producing harmful ozone.

Energy Efficient Compact Fluorescent (CFL) Light Bulbs

- Saves energy while saving you money
- Reduces carbon dioxide (global warming) and sulfur dioxide (acid rain)

The effects of Negative Ion generation

- A Negative Ion is an electrified particle of air with minus(-) electric charge which refreshes our minds and body like the feeling you get when you 捡 e walking on the beach or in the forest, or sitting by a waterfall or in a hot spring.
- When there is a high density of Negative Ions in the air, there is acceleration of cellular metabolism promoting vitality while helping to stabilize the nervous system, removing multiple germs, making one 担 blood clearer and helping relieve fatigue.
- Negative ions also remove a dust, mites, airborne contaminants, cigarette smoke, offensive odors, animal dander, toxic chemical fumes and positive ions generated from TVs, computers and other electrical devices.

Negative ions are attracted to this positive charge like the opposing poles of a magnet. When the negative ion gives up its charge to the particle, it becomes attracted to other positively-charged particles in the air, forming masses that are too heavy to remain suspended.

Health Benefits

Negative ions have been linked to increased alertness and a general feeling of well-being by many studies. Toyota's study showed it reduced fatigue in drivers, while Columbia University's study suggested that negative ions might be more effective than Prozac or Zoloft at reducing depression.

- Reduced asthma and allergy symptoms
- Increased alertness
- Reduced fatigue
- Improves sleep
- Reduces migrane headaches
- Removes pollen, bacteria and smoke

Product Features

- 10,000 life span
- Generates 900,000+ negative ions per cubic centimetre

wattage Available	15w	18w	20w	23w	26w	30w	36w
length of Lamp	139 mm	147 mm	147 mm	156m m	163mm	172mm	179mm
length of Tube	62m m	70m m	70m m	79m m	86mm	95mm	102mm
