Instructions for MT-301 Micro Torch

Please read these instructions carefully before operation, and keep these instructions with the torch.

Temperature of flame: 1300° C (2500° F)

Gas Fill/Refilling:

- Refill in well ventilated area
- Use only high quality butane
- Make sure the adjustment knob has been turned off
- Shake butane container
- Insert the butane nozzle into the torch whilst holding it upside down
- A complete fill will take 10 seconds
- Allow gas to settle in torch for a few minutes before operation

Igniting the Torch:

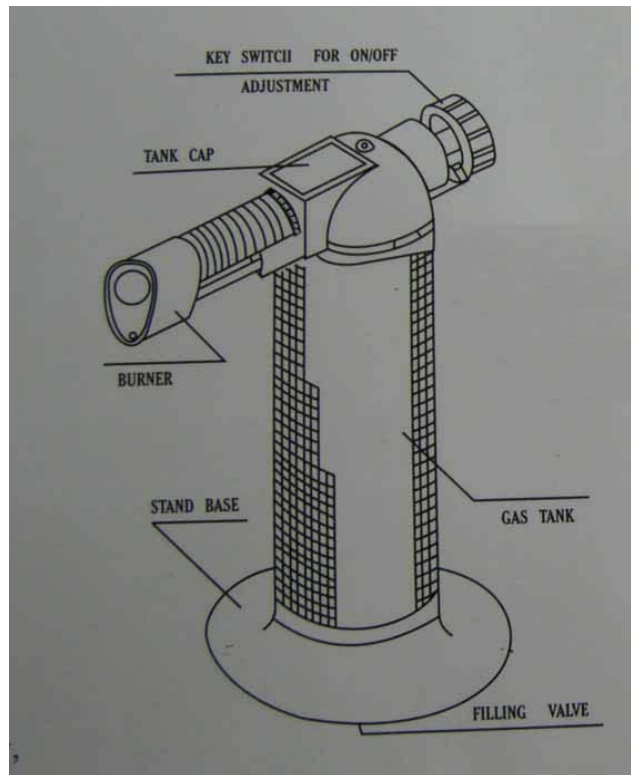

- Use torch in well ventilated area only
- Turn adjustment knob counter clockwise
- Press ignition button
- Adjust the flame length to between 15 and 30mm
- Overextending the flame may waste gas and un-stabilise the flame

Turning off the Torch:

- Turn the adjustment knob clockwise till the valve is firmly shut
- Make sure the adjustment knob is fully closed and the flame is extinguished after use

*WARNING

- Do not touch flame guard after use/when hot
- This is not a toy, keep out of reach of children at all times
- Butane gas is extremely flammable, please handle with care
- Always point away from face and body when igniting and using
- Do not store in direct sunlight or in any area that may exceed 40° C (104° F)
- Do not continuously operate torch for longer than 15 minutes
- Never dispose of this item in fire
- Never puncture this product
