

Type: MJAF-01

Highlights:

**Very stable solenoid valve which
Can ensure more than 500,000
times of use;**

**Low power consumption and the
battery life is more than 2 years;
High-quality brass body and
valve with high-quality chrome
plated; Rank among the top-
level products...**

Characteristics:

Touch-free usage to eliminate cross-contamination; outside installation, easy to Install and maintain.

State of the art electronic technology shows high sensitivity and stability, self-adjusting performance in different lighting situations.

Tasteful design with brass body and chrome finish, guarantee stylish ness and durability..

Different working mode to meet the user's requirement of water saving.

Multi-safety protection ensures the product perfectly.

A. Power lack protection: Light in the sensor windows flashing indicates low battery; Solenoid shut off automatically when battery is very weak.

B. Cleaning protection: Flow flush automatically exceed 24 hours nonuse.

Widely used in public areas such as hospitals, airports, hotels, restaurants, GMP factories, schools, office buildings, railway-stations, etc
Also suitable for household use.

|---|---|
| Power Supply | DC 6V (4 Alkaline "AA" Battery) 2 years+ (4, 000 uses/month) |
| Water pressure | 0.05-0.8Mpa (8PSI-120PSI) |
| Recognise range | 20-60cm adjust automatically |
| Water inlet/outlet pipe diameter | G1/2" |
| Recognition time | <1s |
| Main Flushing Time | 4, 6, 8, 10S (could be adjustable) |
| Protection class | IP 54 |

Inner Packing: 1pcs/box

Outer Packing: 6 pcs/carton

20' Container: 2796pcs

40' Container: 5796pcs
