

## Type: MJS-01

Advanced electronic technology keeps high sensitivity and stability; Low consumption design and the battery lifetime is more than 100,000; Special structure with liquid soap or foam come out from rubber tube; excellent function with many years' experiences usage; Positioning in top-level products...

- Characteristic:
- \* Touch-free usage to eliminate cross-contamination.
  - \* Advanced electronic technology keeps high sensitivity and stability.
  - \* High-level taste design with guard device to prevent thieving.
  - \* Offer the soap container could be filled with liquid soap as required by user. Also could be used for liquid bag.
  - \* Come out liquid soap or foam soap.
  - \* Easy installation and low consumption design keeps the battery usage life exceeding 100,000 times.
  - \* The visual window is convenient to see the liquid soap situation.
  - \* Widely used in public areas such as hospitals, airports, hotel, restaurants, GMP factory, schools, office buildings, railway-stations and many other areas. They also can be used for home kitchens and bathrooms.

### Specifications:

Battery Supply	DC 6V (4 Alkaline "AA" Battery)
Battery Life	>100,000 times
Liquid Capacity	1000ml (1000 drops)
Recognise Range	5-10cm
Product Size	320*140*120MM
Recognition Time	<1.5S
Dispense Dose	1ML
Material	ABS Plastic

**5 Year Limited  
2 Year on sensor**
