

LAPTOP STAND

With the increasingly quantity of notebook, notebook changes our work-and lifestyle completely, meanwhile it becomes also a potential threat of health. The Ergonomic Expert Alan Hersch, director of ergonomics Lab from US Cornell University, pointed out, it exists some ergonomic flaws in the notebook design. Long-term utility of notebook, which keeps forcing people too close to the screen and stiff their neck down, could cause occupational strain on human body.

In order to prevent and reduce the occupational strain, we produce the "LAPTOP STAND", which can easily change the notebook to a desktop computer. The incidence rate of some kinds of the occupational strain (i.e. eyes, neck shoulders and arms) can thereby obviously reduced.

LAPTOP STAND is made of 100% aluminum

Size(AL):308*256(mm) / Weight(AL):710g
Size(AS):295*225(mm) / Weight(AS):665g

Colors available: silver, black, red
Model Number: AL-S, AL-B, AL-R,AS-S, AS-B, AS-R
(*Where "S" is Silver, "B" is Black, "R" is RED.)
