

LCD/Plasma/HDTV Screen Cleaner

1. Background of Screen Cleaners

Since we first developed LCD/Plasma/HDTV screen cleaners 10 years ago, numerous generic cleaners have appeared online.

The Screen cleaners' advanced formula has passed test after test from top computer screen and TV manufacturers and earned the trust of thousands of technicians. Why? Unlike our competition, Ours non-toxic and environmentally friendly formula safely removes dirt, dust, and fingerprints to keep your screen looking brand new without damaging your screen's protective coating or irritating your skin. Our micro-fiber polishing cloths are also quality engineered to prevent streaking even on the hardest to clean screens. We understand that our customers invest a lot into purchasing their computer or TV. That is why we go to such great lengths to provide quality products to protect your investment.

We stand behind our products and give our complete attention to our customers questions and concerns. Unlike other companies, our customers come first, many of which we know after years of repeat business. If you are not satisfied with your purchase at all you can call us and we will guide you through cleaning your screen, answer all your questions, and if we can't fix the problem to your satisfaction we will refund your money.

The screen cleaners are used, sold, or recommended by Apple™, Dell™, Fujitsu™, HP™, Mitsubishi™, Panasonic™, Samsung™, ViewSonic™, and Stewart Filmscreen™. Also Recommended in the New York Times™, The Wall Street Journal™, HDTV & DVD Etc Magazines™, MacWorld Magazine™, and more.

All Screen cleaner are safe to be used on all LCD, Plasma, HDTV, and Big Screen TV Displays. CD cleaner, DVD cleaner, screen cleaner for all computer, plasma, LCD, HDTV, iPod, iMac, Dell, and HP screens, our screen cleaner Polish safely cleans and protects your most sensitive electronic equipment.

2. High-tech Bio Screen cleaner.

A. Biodegradable/Cornstarch/PLA/vegetable-based bottle

'PLA' is a very promising raw material, made from renewable resources, an exciting new resin derived from a renewable source, corn and other plant starches. The starched are broken down through a fermentation and distillation process and reduced to a monomer called lactide. This is then further processed into the end product which is (polymerised lactic acid) resin from which bottles are then able to be blown from. The biggest advantage that PLA bottles offer is the fact that they are made from renewable sources.

The main benefits of PLA bottles are:

- They are biodegradable in industrial composting conditions which benefits the environment through minimising the impact on landfills.
- They are environmentally friendly
- They are made from a plentiful non-depleting source

Created by Ningbo Lidl Commodities Company, over 10 years manufacturer experiences for Plasma/LCD/HDTV Screen Cleaner, Lens Cleaner, Waterless hand sanitizer/hand sanitizer, Foaming cleaner, PLA/Biodegradable/Cornstarch Bottle, Biological cleaner liquid, Room air freshener, always in the leader of New products. -----"Competitive Price and Reliable Quality is your Best Partner"

- They use 20-50% less carbon fuels to produce
- They are not derived from petroleum the traditional source for plastic bottles and packaging

B. Biological Cleaner Liquid

Exclusive biological technology, practical, safe & environment friendly,

Liquid extracts from the fresh natural biological organisms, unique high-tech, alcohol-free, without eroding the main frame or components, Convenient, safe, clean, germicidal, maintaining and antistatic, instant but nonstick.
