

## HJ-610 Bill Counter

Thank you for choosing HJ-610 Bill Counter. We hope you enjoy using it.

HJ-610 Bill Counter incorporates the latest technological advancements, which allow for high level performance in an ultra compact unit. This small yet powerful machine boasts many features of a professional grade currency counter. These include a 1000-1300 bills per minute counting speed, an add+batch mode, and a 0-9999 batching and auto/manual operation option. Digital functionality, a reliable counterfeit detection system, and a user-friendly interface make this currency counter an invaluable tool in everyday money processing tasks.

With an emergency stop feature, a snap-open front cover, and built-in self-checking system and the HJ-610 is truly a “smart” assistant you can rely upon in any cash-intensive environment.

**Main feature**

1. Auto or manual start/ stop/ clear
2. Intelligent Self -Testing function
3. Add / Batch function
4. Detection function
  - 1) Abnormal note detection
    - a) Half banknotes
    - b) Double banknotes
    - c) Linked banknotes (Chain banknotes)
    - d) Narrow notes
  - 2) Counterfeit note detection (optional)
    - a) UV ( Ultraviolet )
    - b) MG ( Dual magnetic )
5. External display (optional)

**Unique Features**

1. Safe for User
  - 1) **DC12V power supply** --- safe when touched by hand.
  - 2) **Automatic emergency stop** function---safe to users when in emergency. For example, once a woman's hair is rolled into the machine by accident, the machine could stop immediately.
  - 3) **Motor overload protection** function---to avoid any possible harm to users and the machine.
  - 4) **Lower temperature rising**--- after a long-term using, without a high rising of the temperature caused by the motor, even in the high temperature environment.
  - 5) **Short-Circuit protection** on the adapter---to make the adapter much safer.
2. Widely used
  - 1) Besides using in the offices and shops, the machine could also **be used in the cars** by using a special car power connection.
  - 2) Suitable for **100~240V input voltage**. In hence the machine is available for those places with unstable and fluctuant input voltage.
3. Stable
  - 1) The machine rest is made by **one-shot stamping molding** techniques, to ensure the machine stable, durable and low noise.
  - 2) Special designed stacker wheel---to ensure receiving bills stably and avoid bills flying.
  - 3) **Aluminum internal rollers**---to ensure the low influence of the high temperature, especially after a hot transportation or used under the hot

environment.

- 4) **Stainless steel disc code**——to avoid the static problem which could be possible to lead to the counting problem.
4. Easy for maintenance
  - 1) Modularization design for all the parts, especially the power system and the motor——**easier and faster to change the spare parts.**
  - 2) Easier UV adjusting way
  - 3) **50 crews only** in this machine (all the other machines have more than 100 screws in the machine)——easy for assembly and disassembly.
  - 4) **Self-Diagnosing** of malfunctions and result indications——find the problem easily and quickly.
  - 5) Simple and terse design of the wiring
  - 6) **Oil free bearing**——reduce the workload of maintenance for this part
5. Compact and unique in design
  - 1) Compact----save space for users.
  - 2) Portable - Light for users to carry.
  - 3) **Openable upper cover** --- unique design in the world, easy for cleaning and taking out the jammed bills by the users.
  - 4) Fashion and special design of the appearance.

Item	Parameter
Counting Speed	1000 -1300pcs/min
Hopper Capacity	100-130 bills
Stacker Capacity	100 bills
Display	3+4 digits LED displays from 1~9999
Max Size of suitable note	175*80*0.15 mm
Power Supply	AC 100-240V, 50/60 Hz DC12V
Power Consumption	< 60W
Dimension	260*260*150 mm (L * W * H)
Net Weight	3.8KG

**HUIJIN** Supply 1 year warranty for all products
