Tailing Recycling Machine

Applications:

<u>Tailing recycling machine</u> is the ideal equipment for iron ore recycling plant to recovery iron powder from iron tailing. This equipment adopting a unique arrangement of the magnetic field, features high efficiency in iron powder recycling, so the economic benefits of iron ore separating plant are greatly advanced.

Feature:

- 1. Stable machine body, reasonable structure, easy to operate, convenient to maintain;
- 2. Small power consumption, long service life;
- 3. According to the delivery capacity of user's tailing, the recycling machine can be divided into 4 union, 6 union, 8 union, 9 union, 12 union, etc.
- 4. There are many diameter options of the recovery disk for users to choose, including 800mm, 1000mm, 1200mm, 1500mm and so on.

Specifications & Technical Parameters											
Model	Specification	Working Area m ²	Power kW	Spindle Speed RPM	Surface Magnetic Field	handling capacity t/h	Weight kg				

					Gs		
HSJ0808	Ф800×8	12	5.5	1	1500	200	4500
HSJ1008	Ф1000×8	15	5.5	1	1500	240	5000
HSJ1508	Ф1500×8	20	5.5	1	1500	280	5500
HSJ1510	Ф1500×10	25	5.5	1	1500	350	5800
