

Werson Fencing Systems is the one of the Chinese leading specialist manufacturers of Temporary Security Fencing System. From customers' requirements, Werson Fencing Systems offers a comprehensive service to design, manufacture and install fencing. All products are designed in accordance with the requirements of ISO 9001:2000 and all meet the appropriate health and safety standards. Werson Fencing Systems is an accredited manufacturer under the Secured by Design scheme.

Werson Fencing Systems provide a wide range of temporary fencing systems and products, including:

Temporary fencing

Temporary pool fencing

Crowd control barriers

Our temporary fencing systems can quickly and easily be installed, without the need to disturb the surface area by digging holes or laying foundations.

Our products can serve in the following uses:

Temporary fencing to secure construction sites and private property

Temporary fencing of residential housing sites

Temporary fencing and crowd control barriers for major public events, sports, concerts, festivals, gatherings... etc.

Temporary safety fencing for swimming pools.

Crowd Control Barrier

Werson Fencing Systems provide a wide range of crowd control barrier systems. They are the most cost-effective option for large areas. Steel tube vertical infill bars, rather than mesh. They are fully Hot Dipped Galvanized after welding. Each barrier is completely dipped in a Gal bath after manufacture. This is the best galvanizing process available. It will be far more weather resistant and durable, and will last much longer than other Crowd Barriers on the market. They have specially designed Flat Feet, making the barriers very stable and much safer than claw foot barriers which are prone to being a tripping hazard.

Specification:

Frame: 25mm O.D.

Infill Pickets: 20mm O.D.

200mm spacings

Finish: Hot Dipped Galvanized

Feet: Flat Feet - removable

Panel Size is according to customers' requirements.
