

Sanxiong factory, an experienced brick making equipment manufacturer from China, is the patent owner for this high pressure brick making equipment, is a leading manufacturer of high pressure brick making equipment!

transport brick making equipment for customer:

MZJ360-3 high pressure brick making equipment technical parameter:

Production capacity bricks(pcs/h)	3200-3600
Nominal pressure (KN)	3600
Each time formation(pcs/once)	3
Make bricks specification(mm)	240*115*53
	240*115*90
	240*190*90
	240*240*90
Motor of host machine (kw)	18.5
Weight (t)	5.5

double edge runner in customer's brick factory:

Edge runner technical parameter:

Diameter of Box: 1800mm	Grinding Time: 5~6min
Diameter of Wheel: 600mm	Motor: 11KW or 15KW
Equipped with speed reducer	Shaft Speed: 20r/min
Feeding Everytime: 600kg	Dimension: 2200*1820*1500mm

double brick making equipment in customer's brick factory:

Main features of high pressure brick making equipment:

1. **High pressure**, very solid brick, high density brick, **no need pallets**, brick can stack directly.
2. Very **durable**, long service time, low failure rate, due to its design and materials.
3. Long time working, **save you a lot!**

Brick Making Machine, Brick Making Equipment!
