

Air nail guns with up to 3 times the life spans of competing models

Air nail guns

How did we get air nail guns to last up to three times longer than our competitors'?

While other manufacturers outfit their nail guns with hammers that extend only partway down their bodies, our hammers cover the entire body, dampening the force of impact. Plus, our nail guns' housings are made with lightweight and durable die-cast aluminum, instead of the heavy and cumbersome cast-iron housings favored by the competition. To send us your OEM requests or place an order for only 300 units, contact us today.
