## ITOILET HYGIENIC TOILET SEAT

### Pictures:

## Introduction :

The principle of our machine is used the micro computer inside, to control the plastic film wrapped around the toilet seat **automatically** replacing by pressing one button, the used film will be cutted by the blade, to make sure each film are new for each person, the used film can be **recycled** in the agriculture or other industry, then **one person one toilet seat, to make the hygienic visible!**

## Why choose hygienic toilet seat as your product?

There is a study that:

- ◆ **90% people are worry about the hygiene problem when using the toilet?**
- ◆ **70% waste of water or paper are from toilet?**
- ◆ **each year there are 200 millions people are dying from cross infection from using the toilet?**
- ◆ **each year there are 300 millions people are dying from improper using the toilet?**

## Product Prospect:

- 1, the biggest trend**, do you think it is the future trends
- 2, the largest customer**, every person need the toilet, and the average time in outdoor for person is 2/3 of their life, so the public toilet had a lot of customers
- 3, lowest risk**. you invested a product, who can guarantee you will earn money in the future? our product can do that, once you install 1000pcs toilet seat, you can only wait for counting the money in house
- 4, smallest competition**, so far the market is so big, but the competition are so small, because it is an innovation patent product, no one can copy it and sell it, you sell other product, there are too many competitors, then no profit for you

### Compared to general toilet seat:

iTOILET hygienic toilet seat	Normal Toilet seat
→ Enjoying toilet seat by fresh sanitary seat	worrying about the cross infection, such as piss/scurf
→ Prevent across-infection effectively	impossible to keep toilet seat clean completely
→ Safe and comfortable , enjoy it	due to hygienic problem, always being afraid
→ Reduce the waste of toilet paper and water, save the cost	cover-sue toilet paper and water, lead to waste and pipe-jam
→ Reduce dustman workload and ensure cleaning	Never solve the hygienic problem though putting heart effort

### Character:

- 1, Automatically replace the one-time sanitary seat film, more hygienic and healthy
- 2, Suitable for 95% closestools, old toilet can be installed too
- 3, The sanitary seat film can be recycled in Agriculture and industry, to avoid waster of the Resource

### Advantage and benefit:

- 1, Improve company reputation by showing customer care.
- 2, Provide the customer with more comfortable toilet environment.
- 3, Extend the life cycle of toilet.
- 4, Avoid the possible lawsuit caused from customer hurt by mal-using the conventional toilet.
- 5, All the changes only happen to upper cover of toilet.
- 6, Easy for installation and replacement.
- 7, Keep low energy consumption due to advanced design.
- 8, Once invest, long term benefit.

## Profit Analysis:

If you install **3000pcs** toilet seat within **2** year, one year you will install **1500pcs** toilet seat, each month you only need to install **125pcs** toilet seat cover, **do you think it is very easy to finish it?**

**Firstly, What you will get when you install 1000pcs toilet seat?**

Normally our film will be used for 2 rolls per week at least, each roll will earn you USD0.33 at least

That means if one year 1000pcs toilet seat you had installed, it will earn you  $1000(\text{pcs}) * 2(\text{rolls}) * 4(\text{weeks/month}) * 12(\text{months}) * \text{USD}0.33/\text{roll} = \text{USD}31680.00$

**only for the plastic film**

**you will earn USD31680 for 1000pcs toilet seat only from plastic film**

**If you install more than 3000pcs toilet within 1 year, you will earn more than USD100 000 within 1 year**

That can not image! And your customer will thank you because you provide a good product and better service for their customers, it is the future trends for the toilet

## Why Choose Xiamen iTOILET as your supplier?

**1, product integrated design-water proof:** iTOILET designs the toilet seat in European and American style, considering the rest room environment-humid and damp, with whole machine water proof and mother board water proof

**2, Worldwide quality:** iTOILET hygienic toilet seat produced with restarting interval, counter malfunction warning, LED error warning, over-loading protection, easy installation and disassemble to make sure the machine working well

**3, Golden service:** we will provide all service for our customers according to **2\*24\*7**, **2** represent **2 hours** respond, **24** means **24 hours** provide solutions, **7** means the toilet seat can work again **within 7 days**

**4, Strong R & D Team and Patent:** iTOILET had **8** patents so far, compared to other supplier, some of them had 2 patents at most, some of them did not have it

**5, Sanitary film advantage:** our machine only can use our sanitary rolls, but our sanitary film can used in other China manufacturer machine

**6, the biggest profit:** in the market, iTOILET product retailer price is the highest, bu the distributor price is the same with other competitors, then the profit are all earned by our distributor or agent

**7, team work support:** iTOILET will provide some advertisement or some technical support for our distributor or agent, and share some successful experience for our distributor or agent, to help our distributor or agent to sell

Feature explain::

## 2, Manual button:

Our manual button are made of stainless steel(316), it can use 200000 times and totally water proof

## 3, manual button+auto sensor button:

2 in1 function, you can use the manual button or auto sensor to replace the sanitary film, the distance between the wall sensor to your hands is 2~5mm

## 4, Lower voltage warning

If the battery is closely power off, the LED lamp will blinking 2~3 days to remind you of charging the battery or use adaptor to power it

## 5, Error indicator function

If there is some troubleshooting(such as motor or mother board problem), the LED lamp will light on automatically to remind you to repair it

## 6, double cutter for used sanitary film

Our machine had two pcs blade for the used film, one is on the seat ring, another is installed inside the machine, there is no need to replace the blade, our blade are all made of plastic

## 7, restarting interval

Our machine will work one time during 6 seconds, although you press the button or sensor it for a long time, that means, if you press the button, the sanitary film will cost you 6s to replace the sanitary film one turns, then 6s later, you press the button, it will work again, to avoid the waste of the sanitary film

## 8, slow close damping

Seat cover can slowly closed because we installed a damp on the side of seat cover

## 9, Integrated design, super water proof

Our product warehouse cover uses integrated design, to make the whole warehouse is water proof, at the same time, the appearance is more luxury and elegant, fashion

## 10, currency over-flow protection

The normal working currency is about 2.2A, if the currency is enough to 6A, the motor will stop working to protect the mother board and motor from damage

## 11, LED lamp indicator working status

Our LED lamp is at the backside of the stainless steel button, when the machine is working normally, the LED lamp lights off, when there is an error, it will light on or flicker in red color

#### **12, seat cover with human body design**

Our seat ring are designed with human body shape, firstly, the seat ring is more width, it is 69mm in width, secondly, there is a slimy slope for our seat ring, suitable for the hip shape

#### **13, Design with luxury and fashion:**

Our machine are designed with European and American style. suitable for different customers

#### **14, mother board water proof**

Mother board is the key of our machine, the machine are installed in the humid environment, water proof is very important,our mother board can be submerged in water, it can work normally, at the same time, you steam our mother board or boiled it with salty water, it can work normally too

#### **15, seat cover load more than 180kg**

Our seat ring are used PP material, and it can overload more than 180kgOur connector between the warehouse and the seat ring is Nylon with specially material, although you hit it, break it, it did not break down

#### **16, easy installation**

Our machine is very easy to install, you will finish installation less than 3mins, young girl can do that too, we also had the video and the instruction about how to install

#### **17, suitable for 95% toilet seat**

Our machine can install on 95% toilet seat in the market, it is very perfect to install on TOTO, KOHLER, American Standard,and other brand toilet

#### **18, Spare parts available**

We can not say our machine did not have the problem because it was used in the public toilet seat, and some electric components we can provide the free spare parts if it is broken. At the same time, we can provide you other supplier sanitary film

#### **19, counter mal-function protection**

there is a counter inside our machine, it will be sure that the sanitary film turns about 1 meter for 1 time, to avoid the waste of our sanitary film if the sanitary film is installed correctly, if the sanitary film did not installed beneath through the counter, it only works 10s for 1 circle(normal it is 6s), the sanitary film will stop turning

#### **20, Anti-theft function**

Normally our machine warehouse cover can not disassemble because we installed 2pcs clips to prevent the unprofessional person to disassemble the machine
