WWW.DIAMONDINK.CN

Step -1: take out the OEM chip from the chip holder, and install HYD ARC

Step -2: install the chip holder and put it back into the printer

■ **Auto Reset Chips**

- Better than using the chip resetter
- More stable quality, excellent printing performance
- Auto Reset Chips, using for long time

■ **Bulk Ink System**

- 1700ml volume of extra ink tank
- Bigger volume, longer time for using
- Come with check valve inside, filter the impurities of ink, keep ink flowing fluently without nozzle clog when printing
- Float of system will balance the cartridges pressure, printing performance more stable
- Auto Reset Chip keeps system working for long time, do not need to replace the chip again and again

■ **HYD[®] water based pigment ink**

- Top filter equipment, 3.5~4.0 pl size of ink droplet, no nozzle clog problem at all
- High quality raw material, 100% compatible with original ink without any problem, do not need to clean the printer before using HYD[®] pigment ink
- Gives you excellent experience, just like original products, push your business to next higher level
- Reasonable prices, great value are your reasons to choose our products

■ **HYD® sublimation ink**

- Sublimation ink is becoming the obligato product at printing circle, more and more people is going to accept the effects of sublimation ink printing
- Special design for EPSON Piezoelectric technology print head, great quality when printing
- The primary features are as follows:
 - High stability and free of clogging print head.
 - Perfect color saturation and deoxidization
 - Wide color gamut and good compatibility of colors can represent you perfect performance.
 - High resistance to light, rubbing and washing.
 - Includes no forbidden textile dyestuffs.
 - Heat transfer printing on a wide variety of substrates PVC, Ceramic Industry, Polyester for Polymer coated (loaded) material
 - Excellent start-up and run ability
 - Wide gamut space allowing for Pantone® color simulations
 - Wash resistance gives long term color durability
 - Good UV and fade resistance

- Consistent color density for long runs
- Permanently fixed post cure Substrates
- Environmental friendly
- Competitive prices, wide application
