

ES-F SERIES
FOLD ELECTRIC STEP

1. INTRODUCTION

➤ Operation

This folding electric step is controlled by motor.

This folding electric step is operated by means of a design switch which combines perfectly with the modern motor home.

➤ Construction

All folding electric steps have aluminum frames. The step is made of anodized aluminum with safe rounded edges.

All steps are continuously tested. Maximum loading capacity is 200kg.

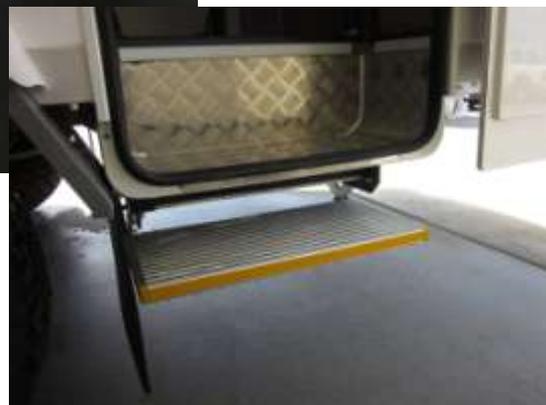

➤ Safety

A switch for connection to a warning light in the vehicle is supplied as standard.

For safety, the folding contraction electric step edges are rounded and equipped with yellow sticker at front edge.

All steps have equipped with anti-slip foot boards as standard.

For safety in the dark, this step equips with a set of LED's as standard.

2. APPLICATION

The folding contraction electric step slide-out can be mounted onto several types of vans by using our special mounting kits:

1. Sliding side door and cab hinged doors
2. Cars, minibuses, taxi
3. Adapted vehicles for disabled vehicles
4. Ambulances and accessible vehicles
5. Motor caravans and campers

3. ADVANTAGES

- Extremely solid and very light weight
- Attention to safety
- Attractive design
- Loading capacity can be 200 kg
- Equipped with anti-slip platform
- Equipped with LED

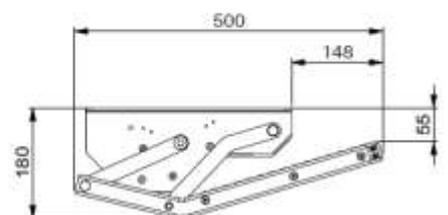

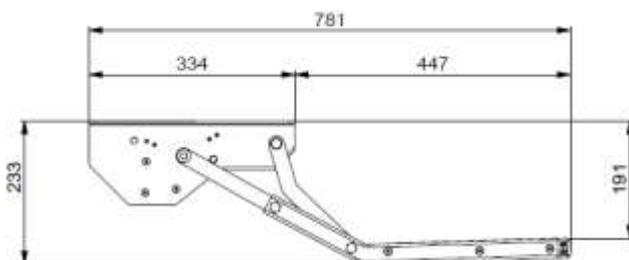

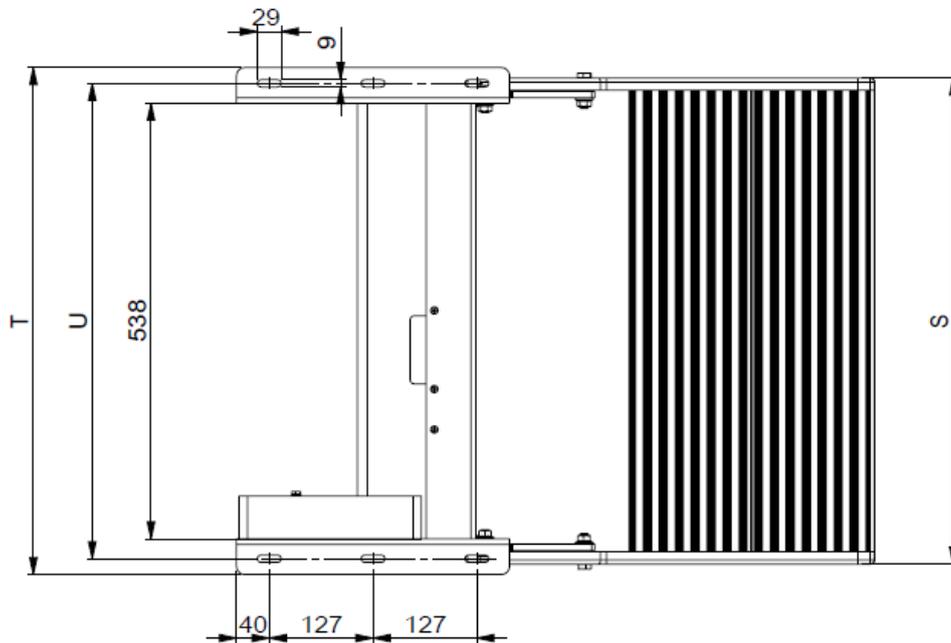

4. SPECIFICATIONS

➤ ES-F-S-450&600

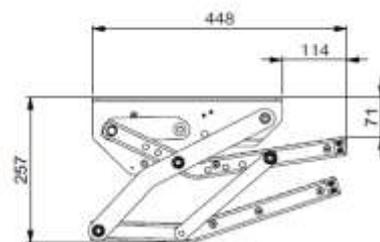

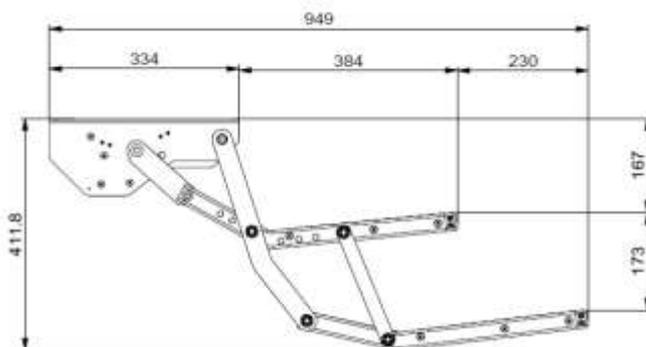

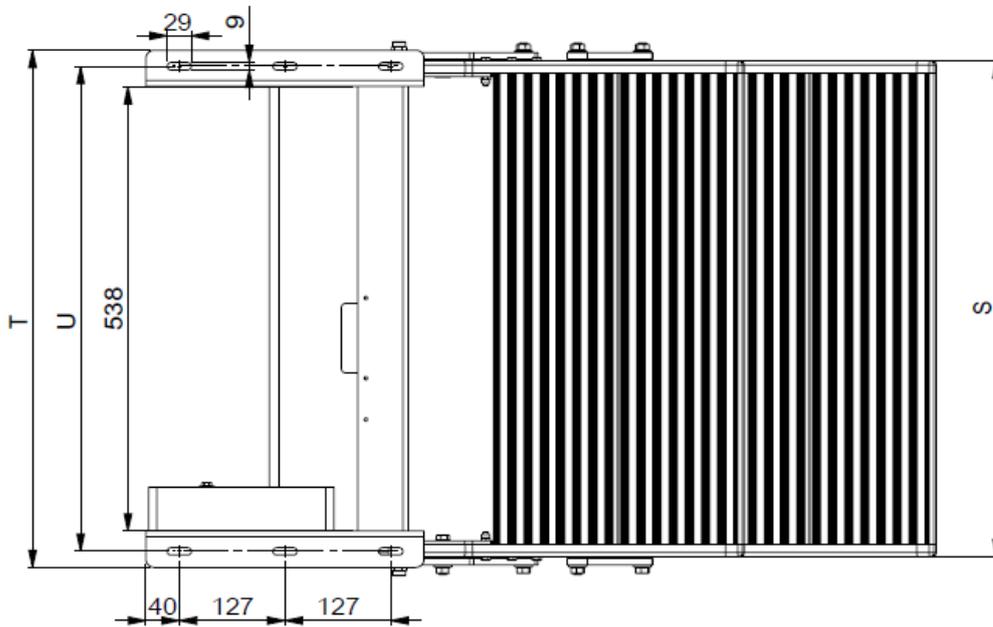

Model	S	T	U	Loading capacity	Voltage	Own weight
ES-F-S-450	450	476	437	200 KG	DC12V-24V	10 KG
ES-F-S-600	600	626	587	125 KG	DC12V-24V	13 KG

➤ ES-F-D-450&600

Model	S	T	U	Loading capacity	Voltage	Own weight
ES-F-D-450	450	476	437	125 KG	DC12V-24v	15 KG
ES-F-D-600	600	626	587	125 KG	DC12V-24v	18 KG

5. FEATURES

This folding electric step slide out is a unique extendable step to be fitted to the caravan. The step is opened and closed by motor and stays locked in the open or closed position by means of a click system.

Meanwhile, this step always remains securely closed during a drive.

The folding electric step slide out is easy to install and it does not take much time, working time is just about 1-2 seconds.

To make the step fit any type of chassis or to determine the height of the step, the installation brackets can be put in four different positions at the time of installation.
