

Diesel Flat Die Feed Pellet Mill

Description

Amisy Diesel Flat Die Feed Pellet Mill of one year guarantee is designed for small-scale production, particularly for homeowners and small-scale producers to make animal feed pellets. It is driven by a diesel engine and can run smoothly with few noises.

Features

1. Equipped with the clutch and accelerating-decelerating device.
2. The pelletizing process is clear and visible.
3. Adopt screw-center adjusting pressure structure.
4. Simple structure, low consumption, easy operation and maintenance.
5. With adjustable compression rate.
6. Driven by a diesel engine.

Pelletizing Process
