

# Wet Type Fish Feed Pellet Mill

## Description

Amisy wet type fish feed pellet mill of one year guarantee is connected to a boiler which can continuously provide steam to the conditioner to achieve expansion of the feed as it leaves the die.

## Features

- 1.You can change different molds to make pellets with different diameters.
- 2.Fish feed pellets can float on the water surface without dissolution for over 12 hours.
3. The fish feed pellet size can be from 0.9-15mm.
4. The spare parts like screw, barrel of wet type will be less damaged than dry type.
5. The feed pellet is more smooth, with better quality and easy to digest..

6. High temperature and high pressure process can kill the salmonellas and bacterial infections.

## Pelletizing Process
