

Fire-resistant test report

Sample supplier	Glory Mica Co., Ltd	Lot. No.	130822 21-1
Size	0.13 X 8mm	Test date	22th, Aug, 2013
Standard	<ol style="list-style-type: none"> 1. IEC331 750-800°C 2. Voltage: 1000V. 3. The mica tape was 50% re-wrapped and wrapped two layers onto the 1.5mm diameter copper wire; and then bind these 3 mica tape wrapped copper wires together; 4. 2A Capacitance wire is not burn out under the voltage of 600-1000V 		
	Characteristic of fire-resistance (90 min)		
检验结论 Test result	<p style="text-align: center;">The voltage of the mica tape was NOT breakdown, and the test environment is as following:</p> <ol style="list-style-type: none"> 1. Voltage: 1000V 2. Burning temperature: 750-800 degree 3. Burning time: 90 min 		
备注 Remark	pass
