Coated duplex board is a type of boxboard with a glossy coated surface on one side for superior printability. This product is typically used as packaging material for small boxes that require high quality printability. It can also be used in combination with high performance corrugating medium and linerboard for the outer layer of corrugated board.

Types: roll & sheet

Ration: 250/300/350/400/450gsm

Size:

1.787*1092mm

2.889*1194mm

3. Customized service to different requirements for customers

Features:

1. Mixed pulp
2. Strong stiffness and excellent folding resistance.
3. Good printability.
4. Adaptable to afterprocessing procedures and can be applied to particular requirements of different products packages.
5. Strict quality control.
6. Customized service to different requirements for customers.

Applications:

Used extensively in Packaging, Printing and Laminating

1. Packaging material for small boxes, like food, wine, toy, drug, shoe boxes and others.
2. Widely used and supplied in printing area, single side color printing, then make cartons which are used as packaging, or used in the design, manual products.
3. Also can be used as a commodity tag, plate and the tap of blister packaging.

Packaging:

1. In Rolls, PE film wrapped, 4 angles protected. Waterproof film.
2. In Sheets, bulk packed on strong wooden pallets wrapped with PE film, 4 angles protected, Waterproof film.
3. In Ream, normally 100 sheets per ream. Ream packed wrapped with PE film, 4 angles protected, Waterproof film.
4. Customized package for customers.
