

CCP- L501 L type automatic heat shrink packing machine

Features

L-type automatic heat shrink packing machine is a automatic unmanned packing equipment adopts PLC control, suitable for all kinds of products packing, PE, POF plastic shrinking packaging material. The whole machine adopts mute design, packaging tightly and sealing solidly, simple operation, easy maintenance. Can be using together with our company "CCP-R" "CCP-RS" series shrinking machine.

- 1) **Energy conservation and efficient** Save labor cost, only need one person operate, putting product on the conveyor belt for packaging easily.
- 2) **Safety and environmental protection** Smokeless produce when sealing, working environment clean. with automatic protection function, effectively prevent cut packing product mistakenly.
- 3) **Convenient and flexible** Simple operation, easy maintenance, packaging immediately, and simply adjusting size, 30 seconds, easy to learn
- 4) **Automation** automatically feeding into the bag, packing- sealing cutting, automatic length adjustment by electric eye control , equipped with induction motor, automatic coiling the waste
- 5) **Wide range of application** all kinds shrink and pack of food, medicines, hardware, plastic products and so on
- 6) **Easy to form a complete set** Using together with our company "CCP-R" "CCP-RS" series automatic shrinking machine, for more automated packing

Application

Food (fresh food, lunch, vegetables and fruit, biscuits outer packing, etc.), medicines, hardware, plastic products, auto parts

Technical Parameters

Model name	CCP-L501
Sealing knife size L*W*H	670*530*(120)mm

mm	
Packing speeds piece/min	25-35
Supply voltage	AC220 50/60HZ 2KW
Air KG/CM2	6
For shrink film	POF 0.012-0.03 fold film
Machine size L*W*H mm	2050*1000*1580
Weight KG	350
