

## VI160288N Slewing Bearings (216x340x39mm) Machine Tool Bearing INA slewing turntable

### A . Slewing Bearings Parameters

**Brand-** TMP  
**number-** VI160288N  
**ing(mm)-** 216  
**ing(mm)-** 340  
**dth(mm)-** 39  
**ight(Kg)-** 12  
**aterials-** GCR15/GCR15SiMn/50Mn/42CrMo/5CrMnMo  
**Series-** VI  
**ion type-** Grease lubrication  
**lements-** Ball  
**irection-** Multi-load  
**tructure-** Four Point Contact Ball,Internal Gear Teeth

### B . VI160288N Slewing Bearings Specification Sheet

Designation	Mass (kg)	Dimensions (mm)					Fixing holes				Fixing screws Fr kN	Gear tooth			Tooth force		Basic load ratings		Basic load ratings	
		Da	di	Di	da	Width	La	na	Li	ni		d0	m	z	Fz norm kN	Fz max kN	dyn. Ca kN	stat. C0a kN	dyn. Cr kN	stat. C0r kN
VI160288N	12	340	216	287	289	39	324	20	252	20	35	224	4	56	12.3	17.8	165	420	108	190

### C . VI type Slewing Bearings Details

**Product I** Slewing Bearings have high load carrying capacity, a versatile range of applications and are highly cost-effective. Due to their design, a single bearing can reliably support radial, axial and tilting moment loads. It is therefore possible in many cases to replace bearing arrangements comprising a combination of radial and axial bearings by a single bearing. TMP Slewing Bearings have Two types: Four point contact slewing bearings and crossed roller slewing bearings.

**Series In** Four point contact bearing, internal teeth, sealed, selectable internal clearance, lubrication nipple on circumference of untoothed ring

**Series M**

**Applicati** Product Application: Turntable, Tower Crane, Excavator, Machine Tools, Gear reducer, Textile machine, wind turbines etc.
