Reinforcing Mesh Welding Machine JK-RM-2500B

Characteristic:

1. Line wire and cross wire both pre-straightened and pre-cut.
2. Structure of reinforcing mesh welding machines: main machine, mesh supporting table, mesh drawing device, cross wire feeding hopper, electric control cabinet, air pump, line wire straightening and cutting machine, cross wire straightening and cutting machines, and could as required to add one device of line wire feeding device.
3. Specially designed cross wire feeding hopper, the machine will stop if there are no wires in the hopper. Panasonic servo motor drawing mesh drawing device. The machine is easy to operate, just need to press one button to finish one panel mesh.

Specification:

| Model | JK-RM-2500B |
|----------------------|----------------------|
| Number of electrodes | 24 |
| MAX. mesh width | ≤2500mm |
| Wire diameter | 5-12mm |
| Mesh length | ≤12m |
| Cross wires space | 50-300mm |
| Line wire space | 100-300mm |
| Electric capacity | 1800KVA |
| Welding speed | 45-65cross wires/min |
| Control system | PLC control |

Application:

Hebei Jiake reinforcing mesh welding machines JK-RM-2500B is especially used for welding reinforcing mesh, which apply to construction mesh, bridge and so on.
