Design Innovation

MACOSTONE had been focusing on the innovation of quartz surface design, and it is also very concerned with the global trends, and tries to surpass it.

Design innovation usually can be divided into two stages, first is development and production of new design, and second is the mature production and marketing.

If you are very concerned about our new designs, please tell us, we will show our new design to you at the first time so as to let you get more advantages in the market competition.

how to find your favorite designs

- Check our brochures or color chart.
- Browse our website
- Email us with your favorites

Regular design and Customized design

- Regular design could have stable quality and on time deliver.
- Customized design may be delayed due to a lot of factors.

For example, pure white slab, snow powder, are regular designs and they are very popular in the market, so it'll be easy scheduled due to all the materials in stock.

Multi colors design.

As for the mixed color products with irregular patterns, we take the aesthetic effects and style as the standard, These design would not have completely consistence.

Special Recommendation:

Only limited to our VIP, it aims to help catch special opportunity to win the competition.

Design development in recent years

Macostone technology had achieved great progress since 2012. Quartz surface quality is very stable. As the leader of quartz stone field, Macostone can feel the great demand from the international market.

In 2013, the export volume rises steadily. New design's production is becoming more and more mature and is accepted by the international market gradually.

In 2014, the export volume soared greatly. A lot of new designs came out and lead the international market.

In 2015, we look forward to working with you and embrace a better tomorrow.
