Introduction:

Eye /Ear /Nasal Drops Liquid Filling Stoppering Cap-Closing Machine

Liquid filling, stoppering, cap-closing machine is a key product that our company developed for more than 15 years. Computer controlled peristaltic pump conduct measure filling, and the servo motor drive in the pump in set by the micro-processor. It's one of the new generation equipment of sterile eye drop production which comply with GMP validations in pharmaceutical industry.

Characteristic:

- 1.PLC control system, peristaltic filling, easy to operation.
- 2.Easy to clean, sterilize, no pollution.
- 3.Can set filling dosage without stopping the machine.
- 4.No bottle, no filling, avoid dripping nozzles.
- 5.Adopts cylinder for stopper and capper
- 6.Constant torsion cap-closing
- 7.100-class laminar flow as option.
- 8.Designed according to the requirements of GMP.
