FLAME RETARDANT ROPE

Aramid rope is characterized by its excellent resistance to flame and heat. Strength has few loss during test for 2 hours in temperature as high as 50°C and as low as -20°C. The rope can withstand the maximum temperature of 175°C for as long as 200 hours, and will decompose at 500°C.

Rope ID	: 180121601030430000	Breaking Strength	: 54.4KN
Name	: Flame retardant rope	(Test at 50°C, 2h)	
Diameter	: 10mm	Breaking Strength	: 55.3KN
Linear Density	: 78ktex	(Test at -20°C, 2h)	
Material	: Aramid Fiber	Breaking Strength	: 52.2KN
Breaking Strength	: ≥50KN	(Soaking, 0.5h)	
(Test at Room Temperature)
