

Xi'an Taijin Industrial Electrochemical Technology Co., Ltd.

Northwest Institute for Nonferrous Metal Research(Group)

COMPANY PROFILE

Xi'an Taijin Industrial Electrochemical Technology Co., Ltd. (Taijin) was founded in 1998 under the name of Northwest Institute for Nonferrous Metal Research (Group) and is a customer oriented and technology driven supplier and manufacturer.

Taijin Company produces a wide range of dimensionally stable anodes—platinized and mixed metal oxide activated titanium anodes, repairs and recoats used titanium anodes. Apart from cathodic protection titanium anodes, our titanium anodes are also involved in the following fields: noble metal electrowinning, sodium hypochlorite water treatment, seawater electrochlorination, electroplating industry, chlor-alkali industry, etc. Taijin Company is SGS Verification Supplier, Bureau Veritas, ISO 9001, GJB9001A certified. Moreover, we passed the test of the third party- Det Norske Veritas (U.S.A.), Inc. Under the standard of MMO Mesh Ribbon-NACE TM0294 and MMO Ribbon-NACE Tm0108.

With our experience, innovation, flexibility, and customer-orientation highly motivated, interdisciplinary personnel guarantees the constant expansion of the family-owned company that exports its products to more than 40 countries.
