

Shandong XinKaite Bearing Co. Ltd. is located in Yandian of Liaocheng in mainland China. Our company concentrates on manufacturing conveying machinery bearings, including conveyor idler bearing, KA bearing, spherical roller bearing, deep groove ball bearing, and also idler roller, idler roller accessories, and 0 class bearing. We enjoy high states in the industry because of our products' high quality and low price, and professional stability.

Started in 2006, formerly Shandong Guan County XinKai bearing Co. Ltd., our company relies on the Yandian professional bearing market, pushes the business to market domestic and abroad. And there are many long-term fixed partners of ours within the areas centered by conveying machinery bearing industry. With our company's gradually growing, from the rough to the bearing, we set up a one-stop production line, with a daily output of million sets. Thus to make our products have a very high market competitiveness.

Deep Groove Ball Bearings Deep Groove Ball Bearings

Our company is in line with the goal of zero defect products, continuously introducing professional production equipments and sound detecting instruments, and constantly improving our products' quality. The strict inspection before leaving the factory, with double test of artificial and instrument, ensures that each batch of products achieve a unified standard.

To be the first class, to do the best quality, to make users satisfied, to ensure customers relieved, are our enterprise purposes. To reduce price with strength and to develop enterprises with sincerity are our management ideas. Welcome conveying machinery manufacturers' contact from all over the world, and become our partners.

Our company mainly produces idler roller bearing, idler roller accessories, KA bearing, 0 class deep groove ball bearing, and also agents other manufacturers' bearings and low noise motor bearing.
