

Xi'an Taijin Industrial Electrochemical Technology Co.Ltd.

Customized Platinum/Titanium or Niobium Electrode

TAIJIN Customized Platinum/Titanium or Niobium is manufactured using the refractory metal-titanium, niobium, tantalum, molybdenum and tungsten in the production and TAIJIN Pure Platinum Coating. The electrocatalytic functional layers of platinum are used throughout virtually the entire electrochemical industry.

- **Substrate:**

Add: NO.15 Xijin Road, Jingwei Industrial Park,
Xi'an 710201 Shaanxi China

Tel: +86 -29 86968453

E-mail: sales@tai-jin.net

Fax: +86 -29 86968453

Web: www.tai-jin.net

Pure Titanium Gr1 & Gr2, Niobium

- **Coating Method**

Electroplating

- **Platinum Purity**

99.99%

- **Platinum Coating Thickness**

0.5-15 microns

- **Platinum Coating Per micron**

21.45g/m² per micron

- **Platinum Coating Thickness Test**

SEM (Scanning Electron Microscope)

- **Application**

1. Cathodic Protection
2. Electrochlorination to anti-fouling and disinfection
3. Hard chrome plating (piston rings, printing cylinders, etc.)
4. Precious and non-precious metal electroplating
5. Electronics and semiconductor industry
6. Pt/Ti anodes Chemical process engineering
