

DHM-15/15B

Ultrasonic Height&Weight Scale

Ultrasonic electronic body scale is controlled by microcomputer. Connected with Computer with wired connection (RS-232) or wireless Bluetooth. This machine can automatically measure the body's height, weight, blood pressure (DHM-150B), voice broadcasting and printing the measuring results after put a coin. What's more, this machine adopts imported ultrasonic detector and sophisticated weighing sensor, which make the results more precise. Our reliable quality guarantee and perfect after-sales service make our machines become the best choice of hospital, School, gymnasium, MEC and so on.

Main Function: Coin-operated

- Imported ultrasonic detector;
- Sophisticated weighing sensor;
- Measuring height, weight, blood pressure(15B)
- Synchronously voice broadcast;
- Automatically calculate BMI;
- Temperature self-control;
- Perfect self-checking system;
- Digital LED Display (time, date and Temperature)
- Display measuring result with thermal printer;

Main Parameter:

Height Range: 80cm-200cm Division: 0.5cm
 Weight Range: 5kg-500kg Division: 0.1kg
 Products Size&Weight: 55*38*235cm 50kg
 Working Voltage: AC110V-220V 50Hz/60Hz
 Standby Power: 10W
 Measuring speed: 480 times per hour
 Carton size: 178*39*21cm 70*35*44cm
 67*41*44cm(Blood Pressure Monitor)

DHM-15A

Ultrasonic Height&Weight Scale

Ultrasonic electronic body scale is controlled by microcomputer. This machine can automatically measure the body's height, weight, blood pressure, heart rate, fat percentage and fat mass, voice broadcasting and printing the measuring results after put a coin. What's more, this machine adopts imported ultrasonic detector and sophisticated weighing sensor, which make the results more precise. Our reliable quality guarantee and perfect after-sales service make our machines become the best choice of hospital, School, gymnasium, MEC and so on.

Main Function: Coin-operated

- Imported ultrasonic detector;
- Sophisticated weighing sensor;
- 8 inch LCD display with touch screen;
- Omron sphygmomanometer&body fat monitor;
- Measuring height, weight, Blood pressure and body fat;
- Customize Body composition analyzer,Oxygen saturation and so on
- Synchronously voice broadcast;
- Automatically calculate BMI;
- Perfect self-checking system;
- Display measuring result with thermal printer;
- Temperature self-control;
- Connected with Computer with (RS-232) or Wireless Bluetooth.
