Historical Moving Route Replay on Computer Webpage Platform:

Phone Tracking

Please download our phone APP for IOS/Android system according to the instruction handbook after you bought trackers.

Tracking Car's Trails By Phone

Tracking car's trails isn't a dream. We developed the APP for using smart phone to track the car. All you need to do is download and install the APP to your phone, and then you can track your car immediately.

Replaying Car's Historical Route

The historical moving route of the latest 3 months of the tracker can be replayed on our Android/IOS tracking APP or Webpage tracking platform.

The system is designed as an automatic fully electronic logbook, which will record every journey a vehicle makes, where it started from, the route travelled, at what speeds, where it went to and for how long it had stopped before starting the next journey. The system includes PC software and mapping, so it is not necessary to login to a slow and tedious website, as all the calculations, routes, maps, graphs, reports, printouts etc are done right here on your own PC.
